WOMEN

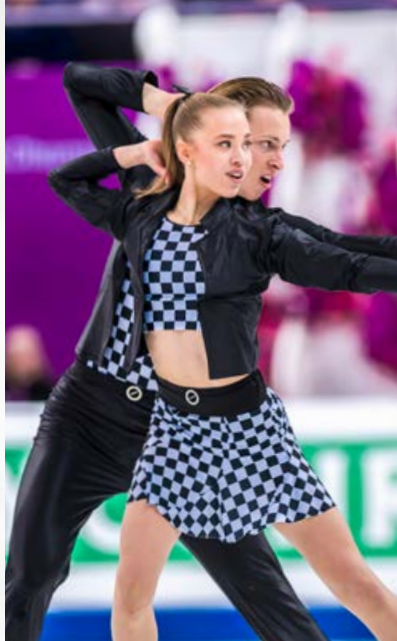

ICE DANCE

Why Edea

We think differently,
we start with the skater
and design for performance.
Edea means...

Greater Feel

Skating is about feel.
Edea designed
to feel the edges.

Innovation

Skating is
about new.
Edea means
innovation.

Faster to perform

Skating is about performance.
Edea designed with shorter
break-in time.

Lightweight

Skating is
about lightness.
Edea think and
design light.

Comfort

Skating is about
ice time. Step
into Edea and
feel the hug.

Sharper style

Skating is about style.
Edea designed with
Italian style.

Skating is a sport about expression, where art meets performance.
It is technique and style. Style is what Italians do.
Step into the rink ahead of your rivals.

Anti-Shock System

PERFORM LONGER, BE SAFER

IMPACT

The problem

When landing, a force up to 8 times your weight sends shockwaves through your body. Even without jumps, ice chatter creates mini-stresses, both of these creates negative energies that can lead to injuries.

SHOCK

The solution

Edea's Anti-Shock System combines Noene to disperse and Poron to absorb these negative energies. Anti-Shock is integrated into the Piano and is available in Impact Insoles and Noene Anti-Shock Undersoles.

DISPERSA

Edea Anti-Shock means

- Minimized impact shock protecting you from potential injury
- Absorbed ice chatter for smoother glide and a more solid base
- Increased stability on landings for quicker transitions and jumps
- Reduced strain on ankles, knees, hips and the back

Piano

Smoother skating
Dual layer anti-shock system reduces impact while increasing stability

Greater thrust
New lateral support for quicker, increased power transfer

More control
Improved heel pocket and extra tongue tabs give an improved foot position for better feel and quicker movement

More comfort
Longer boot collar for greater movement range

Fresh skates
Micro-perforated air tech lining for super quick drying

SUPPORT
EXTRA STRONG

E-Spinner

NEW PROFILE

Designed to mimic a blade to give it a more realistic feel. The new profile reduces friction and increase the feel of being on real ice. The taller rocker and blade profile combine to move the spinning point and create the perfect off-ice partner.

TAKE OFF JUMPS BANDS

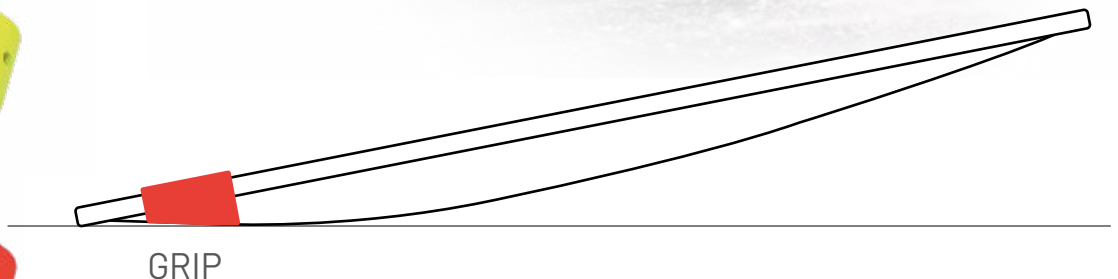

The special bands are to practice take offs. Two bands are included, a softer yellow one for singles and the red for doubles or triples. NOTE: Use without bands for spin practice.

SOFT BAND JUMPS

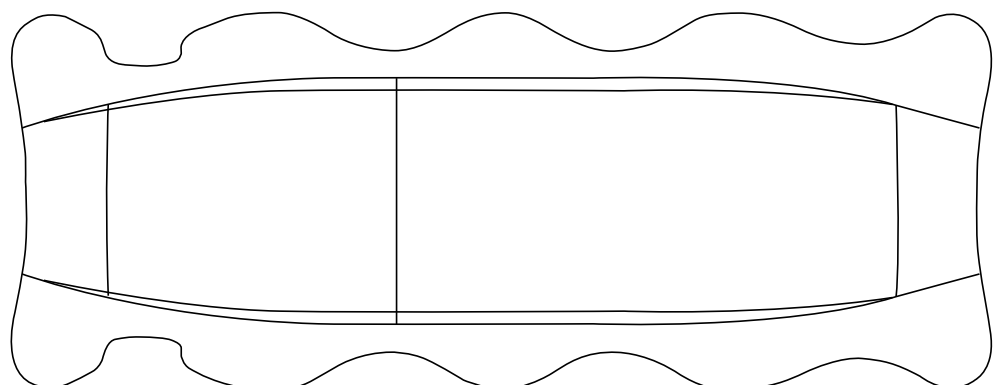

HARD BAND JUMPS

TECHNICAL MATERIAL & MOUNTING

Our innovation makes us better and different.
We need to be sized, fitted, shaped,
laced and mounted in the Edea way.

Sizing

THE PERFECT SIZE

In order to get the correct length you need to use the EDEA MEASURING DEVICE.

THE PERFECT FIT

90% of feet fit our C or standard width. Edea stretchers make the final adjustment to give the perfect custom fit. Overture, Chorus, Concerto, Ice Fly, Piano and Flamenco Ice can be shaped using Edea Instant Custom Fit method.

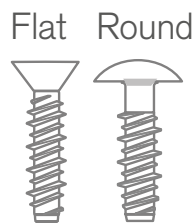

BOOT STRETCHERS are available in sizes:
XS 215-230
S 235-250
M 255-270
L 275-290
XL 295-310
(1 stretcher in each package)

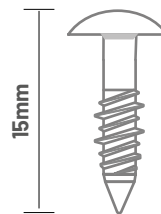

Mounting

Edea boots have technical soles. They need special tools and hi-low dual helix screws for secure blade mounting. Use ONLY Edea screws.

SET OF 100 HI-LOW SCREWS

FOR LIGHTWEIGHT BLADES SET OF 108 HI-LOW SCREWS

USE ONLY WITH LIGHTWEIGHT BLADES

ONE DRILL BIT EXTENSION 2,5 MM.

Specially measured drill bit holder ensures accurate depth of holes. 2,5mm drill bits are used for EDEA Hi-Low screws.

PRE-CUT FILLERS

Essential for repositioning frames. Each pack includes 20x2,5mm pre-cut carbon bars.

Mounting stand

Stands for quick and precise blade mounting are practical and portable.
